

- Company:** Secur3DP+
- Position:** Chief Executive Officer (CEO)
- Location:** Singapore. Citizen or Permanent Resident preferred.
- Position Open:** January 2019
- Scope:** Secur3DP+ is a pre-seed stage startup that is building a software and services platform to enable distributed manufacturing technologies. Secur3DP+ is first targeting the fast growing multibillion dollar 3D printing market. The company's software improves the security of 3D printing workflows, securely connecting designers and customers with additive manufacturing service bureaus.
- Continual improvements in 3D printer hardware including improved speed, level of finish, cost effectiveness, and choice of materials are driving growth in an already fast-moving market. As more companies integrate 3D printing into their supply chain, the risk of valuable designs and IP getting stolen will increase, compelling corporations to take greater measures to protect themselves.
- The company's software is backed by a commercial-ready blockchain ledger and unique embedded digital rights management technology. The successful founder-CEO candidate will have the benefit of proof of concepts, intellectual property, initial business plan and customer leads developed with input from industry experts and the Nanyang Technological University, Singapore (NTU).
- With substantial support from the team at ISF Incubator and NTUitive, the CEO candidate will be responsible for forming a joint venture, developing a commercial-grade product and raising the initial funding round (Seed) to successfully spin out as an independent company.
- Operating in a global market, Secur3DP's product and service will protect both content owners while transferring designs to 3D printing service providers and enable a level of tracking and oversight that is unparalleled.
- Backed by a unique intellectual property portfolio that covers software solutions for file protection and prevents unauthorized

copying, as well as providing the ability to embed unique identifiers into the structure of finished 3D printed products and parts.

Reporting to the board of directors, the successful CEO will lead the commercialization of this technology, first in Singapore and then around the world.

We seek an experienced individual to lead this new start-up company and become a key member of the founding team. The successful candidate will be responsible for building out the management team, laying out a business strategy and ensuring the company is adequately financed (venture capital and others).

Desired Skillset ***A successful candidate will have many of the following:***

5 years' experience in commercialization of services in the software and services side of the 3D printing market. Experience in any segments of IP protection, anti-piracy, anti-counterfeit markets is a plus.

Experience at a startup and demonstrated record in new business formation, new sector creation, early customer adoption success, and successful new product introduction.

Proven ability to raise capital from private equity (e.g. venture capital) is a plus.

Demonstrated success in sales and marketing, particularly in new category, product creation.

Ability to distill complex technical and marketing challenges and create and execute a plan of action and be held accountable to the Board of Directors.

A can-do attitude and a willingness to “roll-up the sleeves” and engage with customers, recruit a like-minded entrepreneurial team and lead by example.

International commercial experience and willingness to travel. Experience living in Asia (or already based in Asia) preferable.

Education: Bachelor's degree minimum in software, engineering or related field. Master's degree and/or MBA or equivalent is a plus.

Other: Must be willing to travel to meet investors, customers, interviewing and recruitment of management team.

Mandarin speaking abilities a plus

Compensation: Attractive, executive venture-backed company economics, including significant founder's equity shareholding.
